

Curriculum Vitae

Name	Deep Ray
Date of Birth	1st July, 1989
Affiliation	Tata Institute of Fundamental Research Centre For Applicable Mathematics Bangalore - 560065 Karnataka, India E-mail: deep@math.tifrbng.res.in Webpage: http://math.tifrbng.res.in/~deep
Education	<p><i>Ph.D. in Mathematics</i>, Tata Institute of Fundamental Research (TIFR-CAM)</p> <ul style="list-style-type: none">• Date: September, 2013 to present• Advisors: Dr. Praveen Chandrashekar (TIFR-CAM) and Prof. Siddhartha Mishra (ETH Zurich and adjunct faculty TIFR-CAM)• I have developed and analysed a high-order entropy stable parallelized finite volume solver for the compressible Euler and Navier-Stokes equations on unstructured meshes. I also constructed appropriated wall boundary fluxes for the numerical scheme, which ensures the satisfaction of a discrete global entropy estimate. Coupled with Monte-Carlo techniques, I have used the solver for uncertainty quantification of the Navier-Stokes equation, with the primary focus on studying the measure valued solutions in the limit of increasing Reynolds number. <p><i>M.Phil in Mathematics</i>, TIFR-CAM</p> <ul style="list-style-type: none">• Date: July, 2012 to September, 2013• Advisor: Dr. Praveen Chandrashekar• I worked on numerical schemes for the Euler and Navier-Stokes Equations that preserve entropy, kinetic-energy and vorticity. This included three-dimensional simulations on Cartesian meshes to study turbulent flows. <p><i>M.Sc in Mathematics</i>, TIFR-CAM</p> <ul style="list-style-type: none">• Date: August, 2010 to May, 2012• Score: 82.37 % <p><i>B.Sc (Honours) in Mathematics</i>, Hindu College, University of Delhi</p> <ul style="list-style-type: none">• Date: July, 2007 to June, 2010• Score: 83.89 %
Research Visits	<p><i>Visiting Research Student</i>, Seminar for Applied Mathematics, ETH Zurich</p> <ul style="list-style-type: none">• Date: May to October, 2014 and August 2015 to May 2016• Visited Prof. Siddhartha Mishra to work with him and his research group.
Publications	<p>Publication in Journals</p> <ul style="list-style-type: none">• U. S. Fjordholm, D. Ray. <i>A sign preserving WENO reconstruction method.</i> Journal of Scientific Computing, pp 1–22 (2015).

- D. Ray and P. Chandrashekar.
Entropy stable schemes for compressible Euler equations.
Int. J. Numer. Anal. Model. Ser. B 4, no. 4, p. 335-352 (2013).

Publication in conference proceedings

- D. Ray and P. Chandrashekar.
Kinetic energy preserving and entropy stable finite volume schemes for compressible Euler and Navier-Stokes equations.
14'th AeSI CFD Symposium, IISc, Bangalore, 10-11 Aug., 2012.

Submitted for publication

- U. Koley, R. Dutta and D. Ray.
Convergence of fully discrete schemes for diffusive-dispersive conservation laws with discontinuous flux.
Accepted for publication in ESAIM: Mathematical Modelling and Numerical Analysis (2015).
- P. Chandrashekar, U. S. Fjordholm, S. Mishra and D. Ray.
Entropy stable schemes on two-dimensional unstructured grids for Euler equations.
Accepted for publication in Communications in Computational Physics (2015).

Conferences and Workshops

- *International Conference on Industrial and Applied Mathematics*, Beijing, China (10th-14th August, 2015)
- *Conference on Computational PDEs, Finite Element Meet*, TIFR-CAM (18th - 20th December, 2014)
- *The 5th International Conference on Scientific Computing and Partial Differential Equations*, HKBU, Hong Kong (8th - 12th December, 2014)
- *Workshop on the Analysis and Numerical Approximation of PDEs*, ETH Zurich (8th - 10th September, 2014)
- *CIME-CIRM Workshop on Mathematical Models and Methods for Living Systems*, Levico Terme, Italy (1st - 5th September, 2014)
- *Swiss Numerics Day 2014*, University of Zurich (25th April, 2014)
- *Workshop on Optimization with PDE constraints*, TIFR-CAM (25th November - 6th December, 2013)
- *Compact course on Discontinuous Galerkin method for time-dependent convection-dominant PDEs*, by Prof. Chi-Wang Shu, TIFR-CAM (4th - 5th July, 2013)
- *International Conference on Conservation Laws and Applications*, TIFR-CAM (1st - 3rd July, 2013)
- *IFCAM Summer School on Numerics and Control of PDEs*, IISc, Bangalore (22nd July - 2nd August, 2013)
- *CIMPA Summer Research School on Current Trends in Computational Methods for PDEs*, IISc, Bangalore (24th June - 19th July, 2013)
- *Workshop on Theoretical and Computational Aspects of Nonlinear Waves*, NPDE-TCA, IIT-Bombay (27th - 31st May, 2013)
- *Advanced Workshop on Non-Standard Finite Element Methods*, NPDE-TCA, IIT Bombay (11th - 15th February, 2013)
- *Heterogeneous Parallel Programming*, University of Illinois at Urbana-Champaign's Online Coursera offering (28th November, 2012 - 28th January, 2013)

- *14th Annual CFD Symposium*, CFD Division - Aeronautical Society of India, IISc (10th - 11th August, 2012)
- *Instructional Workshop on FEM*, TIFR-CAM (2nd - 13th July, 2012)
- *Data Assimilation Research Program*, TIFR-CAM (4th - 23rd July, 2011)
- *Visiting Students Research Programme*, TIFR Mumbai (15th June - 10th July, 2009)

Posters and talks

Talk: *A sign preserving WENO reconstruction*

- Date: 23rd November, 2015
- Venue: Department of Mathematics, University of Würzburg

Talk: *A sign preserving WENO reconstruction*

- Date: 14th August, 2015
- Venue: International Conference on Industrial and Applied Mathematics, Beijing

Talk: *A sign preserving WENO reconstruction*

- Date: 11th June, 2015
- Venue: NARC meeting, Department of Applied Mathematics, University of Washington, Seattle

Talk: *Entropy stable schemes for compressible flows on unstructured meshes*

- Date: 20th December, 2014
- Venue: Conference on Computational PDEs, Finite Element Meet, TIFR-CAM

Talk: *Entropy stable schemes for compressible flows on unstructured meshes*

- Date: 9th November, 2014
- Venue: SCPDE-14, HKBU, Hong Kong

Poster: *Entropy stable schemes for compressible flows on unstructured meshes*

- Date: 9th September, 2014
- Venue: Workshop on the Analysis and Numerical Approximation of PDEs, ETH Zurich

Talk: *Entropy stable schemes for compressible flows*

- Date: 9th July, 2014
- Venue: Department of Mathematics, University of Würzburg

Teaching Experience

- Teaching Assistant for the graduate course on Computation Partial Differential Equations (January - May, 2015)
- Teaching Assistant for the graduate course on Numerical Analysis (August - December, 2013)
- Organised numerical sessions for optimal control at the IFCAM Summer School on Numerics and Control of PDEs-2013. This involved MATLAB coding and ODE-solvers. The models considered were the inverted pendulum, Burgers equation the heat equation in both 1D and 2D set-up. Numerical evaluation of feedback control and solving the estimation problem for noisy partial observations were discussed and implemented.
- Teaching Assistant for the graduate course on Numerical Analysis (August - December, 2012)

Additional Activities

- Member of the Students Seminar Series (S³) committee (August 2012 - December 2013). The purpose of this committee was to organise and oversee talks by motivated students, on mathematical or other science oriented topics.
- Participation with Souvik Roy in *Join the spirit: Find me if you can*, a competition organized by EADS.
 - Cleared the first phase, which required the developed a code for human detection. The code uses the theory of locally normalized Histograms of Gradients (HOG), proposed by N. Dalal and W. J. Triggs. The code is also capable of capturing moving people in videos. The basic algorithm is available in the C opencv library.
 - Currently working on the second and final phase, which requires teams to suggest an algorithm to compare two images containing human figures and assess whether both images contain the same person, within acceptable confidence levels.
- Founding member of *Science Forum*, a society created in 2009 at Hindu College, University of Delhi. The mandate of this society was to bring together the students from various science departments, so that they could share the knowledge gathered in their respective fields and gain insights into other associated areas.
- Founding member of *Caucus*, a society created in 2008 at Hindu College, University of Delhi. The society served as a forum for discussing various burning national and global issues, and training students for the Model United Nations Conferences.

Computer Skills

Languages: C++, Fortran, MATLAB, Python
Proramming Software: FENICS, Deal-II
Visualisation Software: Tecplot, Paraview, Gnuplot, VisIt, Gmsh
