
CURRENT AFFILIATION	Department of Aerospace and Mechanical Engineering University of Southern California (USC) Los Angeles, CA - 90089 E-mail: deepray@usc.edu Webpage: deepray.github.io
INTERESTS	Data-driven computational physics, numerical methods for conservation laws, uncertainty quantification, multi-phase flow through porous media.
EMPLOYMENT	<p>Postdoctoral Research Associate July 2020 – present <i>Aerospace and Mechanical Engineering, USC</i> Developing deep learning tools for uncertainty quantification; investigating strategies to embed physical constraints in prediction models.</p> <p>Postdoctoral Research Associate July 2019 – June 2020 <i>Computational and Applied Mathematics, Rice University</i> Developed high-resolution numerical methods to simulate multiphase flows through real rock structures at the pore scale.</p> <p>Postdoctoral Researcher July 2017 – June 2019 <i>Computational Mathematics and Simulation Science, EPFL</i> Developed machine learning strategies to resolve computational bottle-necks in numerical methods for PDEs.</p>
EDUCATION	<p>Ph.D. in Mathematics September 2013 – May 2017 <i>Tata Institute of Fundamental Research (TIFR-CAM)</i> Advisors: Praveen Chandrashekar (TIFR-CAM) and Siddhartha Mishra (ETH Zürich). Constructed and analysed high-order entropy/energy stable schemes for conservation laws. Developed a parallelized finite volume solver for the compressible Euler and Navier-Stokes equations on unstructured meshes. <i>Awarded the Harish Chandra Memorial Award for the best Ph.D. thesis.</i></p> <p>M.Phil. in Mathematics July 2012 – September 2013 <i>Tata Institute of Fundamental Research (TIFR-CAM)</i> Advisor: Praveen Chandrashekar Analysed numerical schemes for the Euler and Navier-Stokes Equations that preserve entropy, kinetic-energy and vorticity.</p> <p>M.Sc. in Mathematics August 2010 – May 2012 <i>Tata Institute of Fundamental Research (TIFR-CAM)</i></p> <p>B.Sc (Honours) in Mathematics July 2007 – June 2010 Hindu College, University of Delhi</p>

Int. J. Numer. Anal. Model. Ser. B, no. 4, 2013.
- [1] *Kinetic energy preserving and entropy stable finite volume schemes for compressible Euler and Navier-Stokes equations.*
D. Ray, P. Chandrashekar.
14th Annual CFD Symposium - Aeronautical Society of India, IISc, Bangalore, 10-11 August, 2012.

Under Review

- [3] *Solution of Physics-based Bayesian Inverse Problems with Deep Generative Priors.* (submitted, 2021)
D. Patel, D. Ray, A. A. Oberai.
- [2] *A pressure-correction and bound-preserving discretization of the phase-field method for variable density two-phase flows.* (submitted, 2020)
C. Liu, D. Ray, C. Thiele, L. Lin, B. Riviere.
- [1] *On the approximation of rough functions with deep neural networks.* (submitted, 2019)
T. De Ryck, S. Mishra, D. Ray.

SELECTED TALKS *Discontinuous Galerkin discretization of phase-field models for pore-scale flows.* (24th June, 2021)
SIAM-GS 2021, Milan, Italy.

A data-driven approach to predict artificial viscosity in high-order solvers. (14th May, 2021)
Department of Mathematics, University of Würzburg, Germany.

A Deep Learning Framework for p-adaptation. (5th March, 2021)
SIAM-CSE 2021, Fort Worth, Texas.

Data-driven enhancements of numerical methods (2nd March, 2020)
Colloquium Talk, Department of Mathematical Sciences, Michigan Technological University.

Deep learning enhancements of numerical methods (9th September, 2019)
CAAM Colloquium, Rice University, Houston, Texas.

Using deep learning to overcome algorithmic bottlenecks (18th June, 2019)
Invited speaker at NumHyp 2019, Malaga, Spain.

Controlling oscillations in high-order accurate methods through artificial neural networks (28th February, 2019)
SIAM-CSE 2019, Spokane, Washington.

A fully-discrete kinetic energy preserving and entropy conservative scheme for compressible flows (27th February, 2019)
SIAM-CSE 2019, Spokane, Washington.

Controlling spurious oscillations in high-order methods through deep neural networks (15th November, 2018)
High-Fidelity Industrial LES/DNS symposium, Brussels, Belgium.

An artificial neural network as a troubled-cell indicator (10th July, 2018)
SIAM Annual Meeting 2018, Portland, Oregon.

An artificial neural network for detecting discontinuities (11th March, 2018)
7th International Conference on High Performance Scientific Computing, Hanoi, Vietnam.

A high-resolution energy preserving method for the rotating shallow water equation (27th September, 2017)
European Conference on Numerical Mathematics and Advanced Applications, Voss, Norway.

A third order entropy stable scheme for the compressible Euler equations (4th August, 2016)
XVI International Conference on Hyperbolic Problems (HYP2016), Aachen, Germany.

A sign preserving WENO reconstruction (14th August, 2015)
International Conference on Industrial and Applied Mathematics, Beijing, China.

Entropy stable schemes for compressible flows on unstructured meshes (9th November, 2014)
The 5th International Conference on Scientific Computing and Partial Differential

Equations, HKBU, Hong Kong.

Entropy stable schemes for compressible flows (9th July, 2014)

Department of Mathematics, University of Würzburg, Germany.

TEACHING
EXPERIENCE

Instructor:

- MATH-459: Graduate course on Numerical Methods for Conservation Laws, at EPFL (September - December, 2020)
- Mini-course on the Application and Implementation of Deep Learning, at TIFR-CAM (January, 2019).

Course development:

- AME-599 (special topics): Course on Machine Learning and Computational Physics, at USC (August - December, 2020)

Teaching assistant:

- MATH-459: Graduate course on Numerical Methods for Conservation Laws, at EPFL (September - December, 2018)
- MATH-459: Graduate course on Numerical Methods for Conservation Laws, at EPFL (September - December, 2017)
- Graduate course on Computational Partial Differential Equations, at TIFR-CAM (January - May, 2015)
- Graduate course on Numerical Analysis, at TIFR-CAM (August - December, 2013)
- Graduate course on Numerical Analysis, at TIFR-CAM (August - December, 2012)

MENTORING
EXPERIENCE

Master thesis co-supervision:

Niccolò Discacciati	EPFL/Politecnico di Milano	2018
Andrea Romani	EPFL/Politecnico di Milano	2019
Lukas Schwander	ETH	2019
Tim De Ryck	ETH	2019

Bachelors thesis co-supervision:

Moritz Reinders	ETH	2019
-----------------	-----	------

Undergraduate project co-supervision:

- *Data-driven predictions for COVID-19 severity*. USC, 2021.
- *Data-driven predictions for bladder cancer recurrence*. USC, 2021.

SERVICE

- Served as external expert for the oral exam of a Master's project at EPFL (July 2021).
- Session chair and organizer for the minisymposium *Advances in data-enhanced predictive modeling in simulation science* at SIAM-CSE, 2021.
- Judged at the Science and Engineering Fair of Houston (February 2021).
- Judged at the Science and Engineering Fair of Houston (February 2020).
- Led an interactive session on applied mathematics for high-school students visiting Rice University (July 2019).
- Led an initiative to systematically overhaul the waste management and recycling system at TIFR-CAM (2013-14).

- Organised numerical sessions for optimal control at the IFCAM Summer School on Numerics and Control of PDEs-2013, at the Indian Institute of Science, Bangalore.
- Organiser of the Students Seminar Series at TIFR-CAM (2012-13). The purpose of this committee was to organise and oversee talks by motivated students, on mathematical or other science oriented topics.
- General Secretary of the mathematics society ALPHA at Hindu College (2008-09).
- Founding member of *Science Forum* at Hindu College (2008-10).
- Founding member of the model UN society *Caucus* at Hindu College (2009-10).

REVIEW FOR JOURNALS

Journal of Computational Physics • SIAM Journal on Numerical Analysis • SIAM Journal on Scientific Computing • Communications in Computational Physics • Journal of Scientific Computing • Proceedings of the Royal Society A • Computers & Fluids • SN Partial Differential Equations and Applications • Combustion Theory and Modelling • Boundary Value Problems • Communications in Nonlinear Science and Numerical Simulation • Applied Numerical Mathematics • Numerical Algorithms • BIT Numerical Mathematics • Indian Journal of Pure and Applied Mathematics.

COMPUTING SKILLS

Languages:	C++, Python, Fortran
Programming Software:	MATLAB
Visualisation Software:	Paraview, Gnuplot, VisIt, Paraview, Gmsh
Machine-Learning Software:	TensorFlow, PyTorch
